Profile

I am a Frontend Developer with 4 years of experience, proficient in modern frontend technologies (React, Next.js, TypeScript), focused on performance, and developing user-friendly interfaces. I am a team player with strong problem-solving skills and a passion for continuous learning.

Skills

JavaScript (ES6+), TypeScript, React, Next.js(CSR, SSR, SSG), CSS3 (Grid, Flexbox, Animation, Sass, CSS Modules), Microfrontend, Redux, RTK Query, Zustand, React Hook Form, yup, zod, axios-hooks, WebSocket, JEST, React Testing Library, MUI (Material-UI), Tailwind, Styled Component, Storybook, Figma, Web Components, Webpack, npm, yarn, NX Monorepo, Jira, Bitbucket, AWS.

Work Experience | Total of 4 Years of Work Experience

Frontend Developer | EduMagicXR

November 2025 – Present

- I am developing a modern, performance-oriented education management platform using Next.js 15 and React 18.
- I implemented centralized state management with Redux Toolkit and secure API integration with automatic token refresh mechanism using RTK Query.
- I designed a responsive, dark/light theme-supported, and multilingual (TR, EN, AR, DE) user interface using Material-UI (MUI) component library.
- I created a reusable DataTable component with server-side and client-side pagination, sorting, filtering, and search features.
- I automated code standards with ESLint, Prettier, and Stylelint, and ensured clean code sustainability with Husky pre-commit hooks.
- I wrote comprehensive unit and integration tests with 80%+ test coverage using Jest and React Testing Library.
- I integrated Unity WebGL to enable 3D educational content to run on the web platform.

Frontend Developer | MTY Marka Tasarla Software 2025

July 2025 – November

- I served as Frontend Team Lead on two different projects in the mobile device trading and tourism/hospitality sectors.
- I took an active role in planning project architecture, code standards, CI/CD pipeline management, and deployment processes.
- I increased the team's technical quality and productivity through code reviews, PR management, and sprint planning.
- I developed performance-oriented, SEO-friendly, and scalable interfaces using Next.js (App Router) + TypeScript infrastructure.
- I enabled modular structures to be developed independently and reused through a microfrontend approach.
- I developed dynamic forms and validation systems using React Hook Form + Yup structure.

Frontend Developer | Edulog Education R&D Information Technology Industry Ltd. 2025

February 2023 – May

- I worked on the following tasks as part of Edulog's educational project.

- Developed all management and reporting pages for 5 different school-related projects using Next.js.
- Created an authorization/session management system with AWS Cognito.
- Built dynamic, performance-focused pages using Islands Architecture.
- Developed state management modules with Redux to handle complex business logic.
- Designed complex forms with dynamic validation rules using React Hook Form.
- Integrated multiple location-based third-party services via REST API to enhance application capabilities.
- Created advanced data tables using MUI DataGrid and Tanstack Table.
- Managed multiple projects and shared libraries using NX Monorepo, optimizing dependency management, modular architecture, and CI/CD processes.
- Wrote unit tests for components using Jest and React Testing Library, increasing test coverage and maintainability.
- Developed fully responsive and pixel-perfect UIs based on Figma using Tailwind CSS and Styled Components.

Freelance Frontend Developer | KS HABITHOUSE 2025

March 2025 – November

- Developing a real estate management system and customer interface using React.
- Designed complex forms with dynamic validation using Formik.
- Created reusable components and React hooks to improve project maintainability.
- Built high-performance CRUD interfaces using Chakra UI.
- Developed state management modules with Zustand for complex business rules.

IT Responsible Officer | Adana Regional Real Estate and Construction Company 2023

February 2022 – Febr

- Managed corporate IT infrastructure and provided technical support.
- Maintained, installed, and troubleshoot computer network systems and hardware components.

Intern Engineer | Adana Seyhan Municipality

July 2019 – October 2019

- Completed mandatory internship in web programming using Java.

Intern Engineer | LingoSoft Information Technology Services

July 2018 – October 2018

- Completed mandatory internship in desktop application development using C++.

English | B1+

Education

İskenderun Technical University | Master's Degree in Computer Engineering 2022

September 2021 – Sept

GPA: 3.30 / 4 (Education temporarily suspended in early 2023 due to external circumstances.)

Harran University | Bachelor's Degree in Computer Engineering 2020

September 2015 - June

GPA: 3.07 / 4
